The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2141

#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Angles et al., US Pat. No. 5,933,811, in view of Minor et al., US Pat. No. 5,740,252.

As to claims 3, 15, 21 and 28, Angles teaches the invention substantially as claimed.
 Angles teaches a system for delivering customized web pages to users, said system comprising:
 at least one content server that stores web page content for a plurality of web pages
 (Angles, col. 2, line 59 – col. 3, line 40); and

a centralized demographic server that stores demographic information on a plurality of registered users, the demographic information being self-represented,

wherein said content server directs a requesting user to a demographic server where particular demographic information associated with the requesting user is stored (Angles, col. 2, line 59 - col. 3, line 40), said demographic server then retrieves the particular demographic information associated with the requesting user (Angles, col. 2, line 59 - col. 3, line 40 and col. 20, line 45 - col. 21, line 24).

Art Unit: 2141

However, Angles does not explicitly teach a centralized demographic server that stores demographic information on a plurality of registered users, the demographic information being self-represented, wherein the retrieved particular demographic information is provided to said content server. In the same field of endeavor, Minor teaches a system that stores demographic information of multiple users and multiple sites, the demographic information being self-represented, and further comprising providing the demographic information pertaining to the particular registered user from the demographics server to a content server (Minor, col. 2, lines 44-67).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have incorporated the distribution of demographics information, as taught by Minor, into the centralized demographics information system of Angles for the purpose of enabling distributed demographic customization.

- 3. As to claims 4, 8 and 19, Angles-Minor teaches the system wherein said content server produces a customized web page for the requesting user based on the retrieved particular demographic information (Angles, col. 2, line 59 col. 3, line 40 and col. 20, line 45 col. 21, line 24).
- 4. As to claim 5, 18, 22, Angles-Minor teaches the system wherein the content server causes the retrieved particular demographic information to be stored on a user's computer associated with the requesting user (Angles, col. 11, lines 5-26 and col. 20, line 45 col. 21, line 24).

Art Unit: 2141

- 5. As to claim 6, Angles-Minor teaches a system wherein said content server delivers the customized web page to the requesting user on the user's computer associated with the requesting user (Angles, col. 11, lines 5-26 and col. 20, line 45 col. 21, line 24).
- 6. As to claim 7, Angles-Minor teaches the system wherein said content server thereafter utilizes the stored retrieved particular demographic information from the user's computer for at least on subsequent web page request (Angles, col. 11, lines 5-26 and col. 20, line 45 col. 21, line 24).
- 7. As to claim 9, Angles-Minor teaches the system wherein the requesting user controls the information within the particular demographic information that is provided from said centralized demographic server to said content server (Angles, col. 13, line 55 col. 14, line 58).
- 8. As to claim 10, Angles-Minor teaches said system wherein said demographic server requires authentication of the requesting user before the particular demographic information can be provided to said content server (Angles, col. 17, line 40 col. 18, line 34).
- 9. As to claim 11, Angles-Minor teaches the system wherein the authentication of the requesting user is provided using a login name and password (Minor, col. 3, lines 37-59).

Art Unit: 2141

- 10. As to claim 12, Angles-Minor teaches the system wherein the demographic information does not particularly identify the user (Angles, col. 13, line 55 col. 14, line 58).
- 11. As to claim 13, Angles-Minor teaches the system wherein a plurality of different content servers are able to utilize the demographic information stored at said centralized demographic server (Angles, col. 2, line 59 col. 3, line 40 and col. 20, line 45 col. 21, line 24).
- 12. As to claim 14, 16, 17, 23, Angles-Minor teaches the system wherein the requesting user requests a first web page,

wherein said content server causes the retrieved particular demographic information to be stored on a user's computer associated with the requesting user (Angles, col. 11, lines 5-26 and col. 20, line 45 - col. 21, line 24), and

wherein said content server thereafter receives and utilizes the stored retrieved particular demographic information from the user's computer appended to, part of or provided with at least one subsequent web page request (Angles, col. 2, line 59 – col. 3, line 40 and col. 20, line 45 – col. 21, line 24).

- 13. As to claim 20, Angles-Minor teaches the method wherein the content server is a demographics aware server (Angles, col. 13, line 21 col. 14, line 67).
- 14. As to claim 24, Angles-Minor teaches the method wherein the customized web page is customized in a manner other than with respect to an advertisement user (Angles, col. 11, lines

Art Unit: 2141

5-26 and col. 20, line 45 - col. 21, line 24).

- 15. As to claim 25, Angles-Minor teaches the method wherein said method further comprises the acts of receiving a login request from the requestor; and determining, in response to the login request, whether the requestor has been authenticated, and wherein said accessing is performed after the requestor has been authenticated (Minor, col. 3, lines 37-59).
- 16. As to claim 26, Angles-Minor teaches said method wherein the login request is a request to log into the content server (Minor, col. 3, lines 37-59).
- 17. As to claim 27, Angles-Minor teaches said method wherein said producing operates to produce the customized web page at the content server (Angles, col. 11, lines 5-26 and col. 20, line 45 col. 21, line 24).
- 18. As to claim 29, Angles-Minor teaches said method wherein the self-representing demographic information does not include any name, address or telephone number (Angles, col. 13, line 55 col. 14, line 58).
- 19. As to claim 30, Angles-Minor teaches said method wherein the self-represented demographic information is retrieved from a central demographic server coupled to the network of computers (Angles, col. 11, lines 5-26 and col. 20, line 45 col. 21, line 24 and col. 13, line

Art Unit: 2141

55 - col. 14, line 58).

### Response to Arguments

Applicant's arguments filed July 14, 2004 have been fully considered but they are not persuasive. The applicant argued in substance that:

A) There is no motivation to combine Minor with Angles.

As to point A), in response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988)and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Angles provides a centralized demographic system that customizes advertisements using demographics information. In the same field of endeavor, Minor teaches transferring demographics information thereby enabling distributed processing of demographic information.

B) The prior art does not teach the invention as claimed.

Art Unit: 2141

As to point B), the rejection has been clarified to more clearly point out the mapping of the prior art to the invention as claimed.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul H Kang whose telephone number is (571) 272-3882. The examiner can normally be reached on 9 hour flex. First Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rupal Dharia can be reached on (571) 272-3880. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
